

This play structure design will meet ADA Accessibility

Guidelines for Buildings and Pacilities, effective November 17, 2000 as published by the Architectural and Transportation
Barriers Compliance Board with the addition of ___NA_
ground level play components of __NA_different types of
play and when installed over accessible surfacing.

2. This site plan should be checked against the actual site area prior to the purchase or installation of equipment.

3. The unit of measure located in the center of the platform indicates the height above the protective surfacing level. The protective surfacing for this design must accommodate a fall

4. The structure size for this unit is 32×29 requiring protective surfacing for an overall use zone of 44×41 . The approximate surface area is 1132 sq. ft., as required

by ASTM F 1487-01 guidelines. The structure is designed to accommodate 32 children from 5-12 years of age.

6. Supervise Children as they play.

7. To Kosure that accurate measurements are obtained from this

site plan, print copies on 11 x 17 paper at full scale. I. The customers responsibility is to check local soil conditions and drainage within the site. The site must also be surveyed for

height of at least 8 ft.

underground utilities prior to excavation.

Completely read your installation manual prior to beginning construction.

10. This design configuration is the property of this firm and

Playland Inc. and may not be reproduced or used in any manner without the expressed written consent of this firm and Playland

11. Perimeter Requires 34 Land Scape Timbers 4' Long.

Scale:

None
