

Note:

- This play structure design will meet ADA Accessibility Guidelines for Buildings and Facilities, effective December 17, 2000 as published by the Architectural and Transportation Barriers Compliance Board with the addition of _____ 1 ground level play components of _____ 1 different types of play and when installed over accessible surfaces.
- This site plan should be checked against the actual site area prior to the purchase or installation of equipment.
- The unit of measure located in the center of the platform indicates the height above the protective surface level. The protective surface for this design must accommodate a fall height of at least _____ 4 ft.
- The structure size for this unit is _____ 28 x 8 _____, requiring protective surface for an overall use zone of _____ 40 x 20 _____. The approximate surface area is _____ 615 sq. ft., as required by ASTM F 148-91 guidelines.
- The structure is designed to accommodate _____ 24 children from _____ 2-12 years of age.
- Supervise Children as they play.
- To insure that accurate measurements are obtained from this site plan, print copies on 11 x 17 paper at full scale.
- The customer responsibility is to check local soil conditions and drainage within the site. The site must also be surveyed for underground utilities prior to excavation.
- Completely read your installation manual prior to beginning construction.
- This design configuration is the property of this firm and Playland Inc. and may not be reproduced or used in any manner without the expressed written consent of this firm and Playland Inc.
- Perimeter requires _____ 25' land slope Yards of topsoil.
